The figure displays a sequence of 13 diagrams, each representing a time step t from 0 to 12. Each diagram consists of two vertical arrows. The left arrow is labeled x_1 and the right arrow is labeled x_2 . The relative lengths of these arrows change over time, illustrating the evolution of the system. For example, at $t=0$, the x_1 arrow is short and the x_2 arrow is long. As t increases, the x_1 arrow grows in length while the x_2 arrow shrinks, eventually becoming the longer arrow by $t=12$.
